11 AM Tournament Starts

Sam's Story

Sam is one of Steve and Denise Koenig's four children. In May, 12 year- old Sam walked to Wilson Elementary School. Shortly after arriving at school, he experienced extreme back pain. The school contacted his parents immediately, and Sam was taken to Children's Hospital. As the day progressed, Sam became paralyzed from the waist down. His diagnosis is Anterior Cord Syndrome/Transverse Myelitis. This rare virus attacks the nervous system through the spinal cord causing paralysis. Sam will need long-term medical care and extensive physical therapy.

Sam is home from the hospital and the family is challenged with his care in a non-wheelchair accessible two-story West Allis home. He is currently using a hospital bed and portable commode in the family dining room. A local health club has provided access to their showers for Sam.

This has been a traumatic experience for Sam and his family. We want to help create a comfortable and accessible living environment for Sam with an environment that is filled with promise and the potential for him to walk again on his own.
